DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 13-17, drawn to a telescope with integrated modular segments, classified in class 359, subclass 399.
- II. Claims 18-32, drawn to a satellite having an optical structure, classified in class136, subclass 292.
- III. Claims 33-42, drawn to a payload launched into space, classified in class 244, subclass 158.

Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as use in a space station or a space shuttle and the reflector surface is an integral mass. Invention II has separate utility such as use in as a satellite orbiting the Earth to view images of the Earth's surface. Invention III has separate utility such as a payload sent into space to travel through space without orbiting any celestial body to receive images. See MPEP § 806.05(d).

Claims 1-12 are generic to each of the inventions above.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II nor Group III, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joshua L. Pritchett whose telephone number is 571-272-2318. The examiner can normally be reached on Monday - Friday 7:00 - 3:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Drew A. Dunn can be reached on 571-272-2312. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Application/Control Number: 10/605,797

Art Unit: 2872
